

Brazos Mutual Domestic Water Consumers Association  
Water Conservation Notice  
March 26, 2026  
<https://upperbrazoswater.org/>

Dear Members,

Following this past winter season, our area experienced a lower-than-normal snowpack. As many of you know, snow accumulation in the surrounding mountains plays a key role in replenishing the water sources that supply our system throughout the year. Currently, both the upper and lower storage tanks have water available, and there is no immediate shortage. However, with the reduced snowpack and the possibility of continued dry weather, we feel it is prudent to ask all members to begin practicing thoughtful water conservation whenever possible. Small efforts by everyone can make a meaningful difference in helping maintain a stable supply for the entire community.

We respectfully ask that members consider the following conservation practices when feasible:

- Use disposable plates and utensils when appropriate to reduce dishwashing.
- Limit toilet flushing to when necessary.
- Take shorter showers whenever possible.
- Run washing machines and dishwashers only with full loads.
- Check for and repair any leaks in plumbing fixtures or outdoor hoses.
- Avoid unnecessary outdoor water use.

These simple measures can significantly reduce overall demand on the system while still allowing everyone to meet their daily needs.

Once more, please note that this message is not meant to be alarming. We simply want to stay ahead of any potential issues that could arise from extended dry conditions, unexpected system leaks, or increased seasonal water usage. Your cooperation now helps ensure the continued reliability of the system for all members.

Thank you for your understanding and for helping to conserve water.

If you have any questions or feedback, please contact the board. All members are welcome to attend our monthly Board meetings, held on the second Tuesday of each month. Visit our website for more information.
