

As the water storage tank level drops, the water may become cloudier (more turbid). We expect this to improve as the system stabilizes.

A sincere thank you to everyone conserving water to help us get through the weekend.

Thank you to Board members Donna Casados, Chuck Roberts, Rubel Martinez, and Ryan Costanza for attending our Emergency Board Meeting at 8:30 AM on July 4th. We also appreciate the many Association members who attended, and Meredith Pond for keeping us so well informed.

Thank you to Association Member Audrey Jaramillo for drafting Brazos MDWCA Resolution 2026-4, which declares a water emergency for the Upper Brazos. This resolution may help BMDWCA seek assistance for the shortage and has been sent to the NM Environment Department.

Thank you to Board member Chuck Roberts, Community Liaison Chris Dennison, and NM Rural Water Rider John Rector of Bloomfield, NM, for working through much of the July 4th holiday to help stabilize our fragile system.
